WORK EXPERIENCE

Mobile Developer

FreshDirect | Apr 2024 – Present

- **FreshDirect** is a New York-based delivery service owned by **Getir**. I am currently working as an outsourced **React Native** developer while in **Codeventure**.
- Organization is totally **English** and I managed to cooperate with various developers around the world and developed new modules that improved **performance** and **marketing**.
- This is a great chance for me to observe a big organization, collaborate with different teams and make improvements to an app that is used by **thousands** of people every day.
- Furthermore; I used **TypeScript**, **React Native**, **Jira** and **Git**.

Frontend Developer

Codeventure | Apr 2022 – Present

- **Codeventure** is a software house that has developed Vigo, Joggo, Cornix, etc.
- I had the opportunity to work with people and projects from different sectors. In a very short time, I got a chance to be part of the development of amazing **websites** and **apps**.
- I was the **lead mobile** developer of an **app** that downloaded over **1 million** people. I observed people's expectations of mobile applications.
- I was part of planning apps and communicating with customers. So I could improve my communication skills and see what customers expect from developers.
- Furthermore; I used **JavaScript**, **TypeScript**, **React.js**, **Next.js**, **React Native** and **Git**.

Frontend Developer

Likom | Oct 2021 – Apr 2022

- **Likom** was founded in 1984, as one of the oldest software firms in Turkey. The company has multiple ERP projects that thousands of customers are using.
- I participated in the company's new **ERP** project. It was a great experience to be part of a **comprehensive** project.
- I worked as a **Frontend Developer** and my responsibilities were developing new features and handling bug fixes.
- Furthermore; I used **JavaScript**, **React.js**, and **Git**.

Full-Stack Developer

BEST Transformers | Jun 2020 – Jun 2021

- **BEST** is one of the biggest transformer manufacturers in Turkey. I was in the company's **R&D** team. I got an opportunity to work full-time in the last year of university, school was remote because of the coronavirus pandemic.
- I worked as a **Full-Stack Developer** and during this time, I took part in the development of projects from **scratch** which are being used actively in the firm. I got a chance to work with **engineers** from different fields. Besides these, I developed new features for existing projects.
- Furthermore; I used **jQuery**, **ASP.NET Core MVC**, **React.js**, and **Git**.

PROJECTS I WANT TO MENTION

El Poder Del Amor

The El Poder Del Amor Mobile App is the **official mobile application** of the television program "Kismetse Olur". It has downloaded by more than **1 million** people, reaching a large audience. The Mobile App allows users to **vote** for their favorite contestants, **watch** program episodes within the app, assess compatibility using the Mamacita artificial intelligence system, and foster interactions among users through its matchmaking feature, providing an enriched and interactive experience for the viewers.

5S Inspection

I worked with the team at BEST company, developing a **web-based, mobile-friendly** inspection system using **ASP.NET Core MVC** and **jQuery**. The project was planned in **collaboration** with **industrial engineers**. Through this project, workshops could undergo various **inspections** through the application. The results were presented to the stakeholders in the form of graphical reports. This led to an **increase** in the efficiency of the factory and made easier to **observe metrics**.

Today's History

This is my hobby project. It's an app that showing what happened on this day history with different categories. User can **share** and **add favorites** events. It also has **notification** system to improve user interaction and a **Trivia** for testing history knowledge.
